

Our Philosophy

At Animal Clinic of Granger, we believe in offering an exceptional experience to our clients in a safe, compassionate, and caring environment.

We believe in life long health through routine preventive care, client education, and a healthy lifestyle.

We believe in hiring and employing highly trained, educated and motivated staff that are passionate about animals and their care.

We believe in and strive to promote strong relationships with our staff, our clients, and the community in which we work and live.

It is because of these strong beliefs that we strive to offer superior quality health care through the science and art of veterinary medicine.

Surgery

We perform a variety of soft tissue and orthopedic surgery including spay/neuter, tumor removal, fracture repairs, and torn ACL surgery. To ensure safety, all surgical patients are monitored during procedures. We take pain relief very seriously and employ preventive pain management strategies.

Laboratory

If your pet is sick or injured, and immediate results are needed, our laboratory gives us the ability to get results in minutes.

Pharmacy

Our pharmacy has a complete inventory of pharmaceuticals, prescription diets, shampoos, and external parasite/heartworm preventives, to meet your pet's needs.

Dermatology

Relief for the itchy pet is available with allergy testing and custom-designed treatment plans.

Radiology

On-site computed radiography x-ray equipment provides high-quality images with-in seconds.

Boarding

We offer boarding to all of our patients in our climate-controlled clinic. Each pet receives individual attention and all dogs are hand-walked outside several times daily.

Exotic Species

In addition to cats and dogs, we treat birds, rabbits, rodents, and other exotic pets. We can advise you about maintaining a proper environment and diet for your exotic animal.

Progressive Dental Care

Periodontal disease is the number one health problem in cats and dogs over three years old. Dental disease puts stress on your pet's body and can lead to serious liver, kidney, and heart disease. We provide an extensive dental care program and use the safest anesthesia available.

Our preventive dental services include teeth cleaning, polishing, fluoride, oral rinse, extractions, and oral surgery. We have special training in dental procedures to ensure that your pet receives the best possible care. Preventive dental care may add years to your pets' lives while improving their quality of life.

Individualized Health Care

We custom design a preventive health care plan and vaccination schedule to meet the individual needs of your pet.

Addressing the Needs of Older Pets

Dogs and cats over seven years old are considered seniors and need special attention. To keep pets feeling their best, and with you as long as possible, bi-annual checkups are recommended that include diagnostic testing to screen for common geriatric disorders. Older pets are at higher risk for cancer, diabetes, kidney disease, and other serious medical conditions. Often these conditions come on gradually, and owners may not detect the discomfort they may cause.

In-depth Second Opinions

We offer in-depth exams and Doctor consultations for those patients needing further treatment options and continued care.

New Clients

We are very excited that you have come to Animal Clinic of Granger for your pet's care. As you browse this brochure we hope that you find we strive to offer an exceptional experience through personal care, customer service, and advanced diagnostics.
